

Cut & Fill at Seven Hills Ranch

To make a level platform for building, the tops of the hills will be “cut” or leveled and the dirt will be used to “fill” in the valleys.

For Seven Hills Ranch 17,000 dump trucks worth of dirt will be rearranged, including 6,000 dump trucks worth removed from the site. (= 225,000 Cubic Yards)

Perimeter walls

Retaining wall

Extensive retaining walls from 5' to 25' in height will hold back the dirt fill. Ironically, most of the hills will be removed from Seven Hills Ranch.
